How Shiplap 2.0 Delivers: Traditional shiplap must be face nailed. The 1/8" reveal on Shiplap 2.0 is created from a tongue and groove profile allowing for the shiplap look without nailing into the face of the wood. Installation is faster, easier and cleaner as there's no face nailing to mar the finish or patch after installation.

TerraMai's CEU, **Biophilia and the Myriad Benefits of Designing with Nature**, is an IDCEC and GBCI approved course.

Biophilia can unlock design possibilities that will support and nurture the health, well-being and productivity of building occupants. This course will distill the basic pillars of Biophilic Design to help attendees better understand the benefits and economic value of using nature as a guiding design principle.
